

CERTIFICAT DE CONFORMITE REACH

Regulation (EC) No. 1907/2006 concerning the **registration, evaluation and authorization of chemical substances, as well as the restrictions applicable to these substances** (REACH) dated October 9, 2020 (REACH regulation) governs the handling of chemical substances in preparations and goods.

As a manufacturer of electronic products, EMSFACTORY is, according to Regulation 1907/2006 (REACH), a “downstream user”. Any pre-registration obligation related to the manufacture and placing on the market of chemical substances/products does not apply to our company.

Our products are “articles” within the meaning of Article 3, paragraph 3 of the REACH Regulation and cannot, therefore, be considered as substances or preparations (see, in this sense, Article 3, paragraphs 1 and 2 of the REACH regulation). Additionally, no substances are released from these articles when used under normal and reasonably foreseeable conditions.

Thus, EMSFACTORY is not subject to any obligation to register or create safety data sheets. We **ensure that no substances listed** on the Substances of Very High Concern (SVHC) list are used in the **manufacturing of our products**. In accordance with Article 33 of the REACH Regulation, if any components of the chemicals we use should in the future be classified as substances of very high concern by the European Chemicals Agency (ECA), we will inform you immediately. As a downstream user, we will support the manufacturer of the substances and preparations and provide them with relevant information relating to registration, should the use of these substances and preparations deviate from that provided for in the new sheet safety data or chemical safety report.

To ensure reliable and safe products for our customers, we ensure that your suppliers meet all requirements for chemical substances and materials

On November 3rd 2023
Damien MICHAUD
Technical Manager

A handwritten signature in blue ink, appearing to read 'Damien MICHAUD', with a long horizontal line extending to the right.
